

FCC FOOD GRADE LIQUID CALCIUM CHLORIDE

Product Data Sheet

General Description

TETRA Chemicals produces FCC food Grade liquid calcium chloride (CaCl₂) under Good Manufacturing Practice (GMP) as an odorless, slightly alkaline, clear, colorless to slightly colored fluid, which is available from 32% to 41%.

- The production plants are kosher, and the food grade calcium chloride is also kosher for use during Passover.
- The plant quality management systems comply with the requirements of ISO 9001.

Applications

TETRA FCC Food Grade liquid calcium chloride is used primarily in the food and beverage industry in processing or packaging applications where Food and Drug Administration (FDA) approval for use of a briners grade is not acceptable. Calcium chloride increases the firmness of fruits and vegetables including tomatoes, cherries, olives, and pickles. It also prevents breakup during processing and cooking.

In cheese processing, calcium chloride is added to pasteurized skim milk to help coagulate the curds, increase firmness, and replace calcium lost by heating. Water used to manufacture soft drinks and beer is first demineralized and then remineralized with calcium chloride to assure uniform taste, regardless of the processing location.

Availability

FCC food grade liquid calcium chloride is available from select plant and terminal locations throughout North America. For the location nearest you, contact your TETRA sales or customer service representative.

Because use conditions and applicable laws may differ from one location to another and may change with time, Customer is responsible for determining whether products and the information in this document are appropriate for Customer's use and for ensuring that Customer's workplace and disposal practices are in compliance with applicable laws and other governmental enactments. Seller assumes no obligation or liability for the information in this document. NO WARRANTIES ARE GIVEN; ALL IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE ARE EXPRESSLY EXCLUDED. Further, nothing contained herein shall be taken as a recommendation to manufacture or use any of the herein described materials or processes in violation of existing or future patents.

Safety and Handling

Calcium chloride is a strong salt solution. Wear appropriate protective, impervious clothing. Wear safety glasses with non-flexible side shields or chemical goggles for proper protection of the eyes. Wear appropriate protective non-leather protective gloves and boots. Chemical protective gloves and boots such as PVC or Nitrile are recommended. Leather products do not offer adequate protection and will dehydrate with resultant shrinkage and possible destruction. This product should be handled in areas with proper ventilation. Before using this product, refer to the SDS which is available on the Company's website for complete safety and handling guidelines.

PHYSICAL PROPERTIES

Appearance	Clear/colorless liquid
Odor	None
Assay	32 to 41% by weight CaCl ₂
Crystallization Temperature	-19.5°F (-28.6°C) to 61.5°F (16.39°C)
Specific Gravity @ 68°F (20°C)	1.308 to 1.415
Bulk Density	10.9 to 11.79 lb/gal

CHEMICAL PROPERTIES

Chemical	CaCl ₂
pH	Slightly alkaline
Impurities (on 100% CaCl₂ basis)	
Alkali Chlorides	< 5.0% by weight
Magnesium (as MgCl₂)	< 0.1% by weight
Specifications	
Identification	To pass test
Assay	To pass test
Alkalinity (as CaOH₂)	< 0.03% by weight
Fluoride (as F)	< 40 mg/kg*
Heavy Metals (as Pb)	< 10 mg/kg*
Lead (Pb)	< 4 mg/kg*
Magnesium and Alkali Salts (MgCl₂)	< 5.0% by weight*

*Calculated on the CaCl₂ determined in the assay %
